

SECURE-A-LOT

ACCESS CONTROL SOLUTIONS

AUTOMATED STICKERLESS ENFORCEMENT

Secure-a-Lot Automatic License Plate Reading (ALPR) Systems are designed for easy installation and automatic remote operation for access controlled facilities. Supports both Daily-Fee and Pre-paid Permit users.

Sticker Programs and permit enforcement can be an expensive. The Secure-a-Lot.com Access Control Solution simplifies and automates all aspects of the operation. With four modular components, our real-time database driven systems are designed for rapid ROI and easy installation.

Secure-a-Lot **Automatic License Plate Reading (ALPR) Access Control Systems** capture and record photos of all entering/exiting vehicles and automatically extract license plate numbers as text. A transaction database is created for all cars with time/date stamp, location, license plate number and an evidentiary photo. Violators can be mailed a regular citation or a Photo Ticket for improved compliance.

Many Revenue Models

The database tracks all permitted License Plates: Daily-fee (Visitors), and pre-paid Weekly, Monthly, Seasonal or Annual passes.

Active or Passive Enforcement

Some sites turn away traffic, others let them in and mail citations. Either way, the software for data organization, review, archiving supports your workflow. Plate records may be reviewed for any location, date and time before issuing citations to non-permitted vehicles.

This automated solution easily integrates with your existing infrastructure to augment your staff and reduce your costs, improving the efficiency of your entire operation.
